Election/Restrictions

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a method for operating a gas turbine, the gas turbine comprising a main mixer, the main mixer including a main swirler and a plurality of fuel injection ports, classified in class 60, subclass 776.
 - II. Claims 7-14, drawn to a combustor for a gas turbine and a mixer for a gas turbine engine combustor, said assemblies comprising a pilot mixer and a main mixer radially outward from and concentrically aligned with respect to said pilot mixer, classified in class 60, subclass 748.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method as claimed can be practiced with a main mixer that is not radially outward from and concentrically aligned with respect to said pilot mixer. Such mixers are known in the art combined with the so called "lance injectors".

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
